Your total solution for automated print production.

Introducing Printgroove: a total, simple, affordable solution for all your workflow issues — only from Konica Minolta.

Why Printgroove? Because your customers expect fast, accurate, high-quality output — and on busy days, print jobs can back up. Last-minute changes can compromise delivery schedules. Your equipment is over-stressed or under-utilized. And your staff is feeling the pressure to do more work in less time. Now, you'll have an automated solution to keep up with the rising production demands of your customers — and ahead of your competitors.

- __ 24/7 JOB SUBMISSION
- __ AUTO JOB TICKETING
- __ QUOTING & SCHEDULING
- __ EMAIL NOTIFICATION
- __ FILES IN ANY FORMAT
- __ QUEUE MANAGEMENT
- __ DEVICE MONITORING
- __ SHIPPING & BILLING
- __ DATA ARCHIVING

Coming soon...Printgroove Ready

To complete your total solution for production print efficiency, the new Printgroove Ready module will automate the make ready process with an easy-to-use interface for intuitive control of advanced functions -- so any operator can take on the production tasks that used to require special training.

- __ Print preview to check before you print
- __ Modify scan data: deskew, rotate, etc.
- __ Auto touch-up: crop, creep, scale, etc.
- __ Auto or manual imposition
- __ Tab sheet and editing tab insertion
- __ Header/footer insertion and more

Introducing Printgroove — your scalable, affordable solution for automated print production.

Whether you're a light production printer, CRD or small to mid-size print shop, there's nothing small about your workload. With Printgroove, you'll have a simple way to automate the production print processes you currently do by hand.

Printgroove gives you a streamlined workflow that makes every print job run more smoothly -- from job submission 24/7, through automated job ticketing and quoting, to print queue management, device status monitoring, even finishing, shipping and billing. Printgroove is also scalable to your needs. It can be configured to fit your workflow like a glove, including the ability to handle any traffic volume and accommodate as many printing steps and stations as your business processes demand.

Best of all, Printgroove is an automated production print system you can afford. It costs far less than large-scale legacy production systems — and as little as one-third the price of competitive print management software.

Printgroove comes in three complementary modules, each focused on a specific production print process — and all working together seamlessly to keep jobs moving, optimize the performance of your production resources, save time, reduce costs and increase the profitability of your business.

Printgroove POB GUIDE

The Printgroove module that runs your print floor with automated efficiency — and can be scaled and customized with exactly the functions you need to match your workflow, handle your traffic volume and accommodate as many printing steps and stations as your specific production process demands.

- __Automatically manages job ticketing and job tracking
- __Monitors device operating status in real time
- __Unites all production steps into one seamless flow
- __Expandable for quoting, billing and invoice tracking

Printgroove POB SERVE

This Printgroove module provides web-based, automated digital job submission that keeps you open for business 24/7, so clients can contact your print shop, initiate jobs, set job requirements and track order status -- all via the Internet or corporate Intranet using standard web browsers.

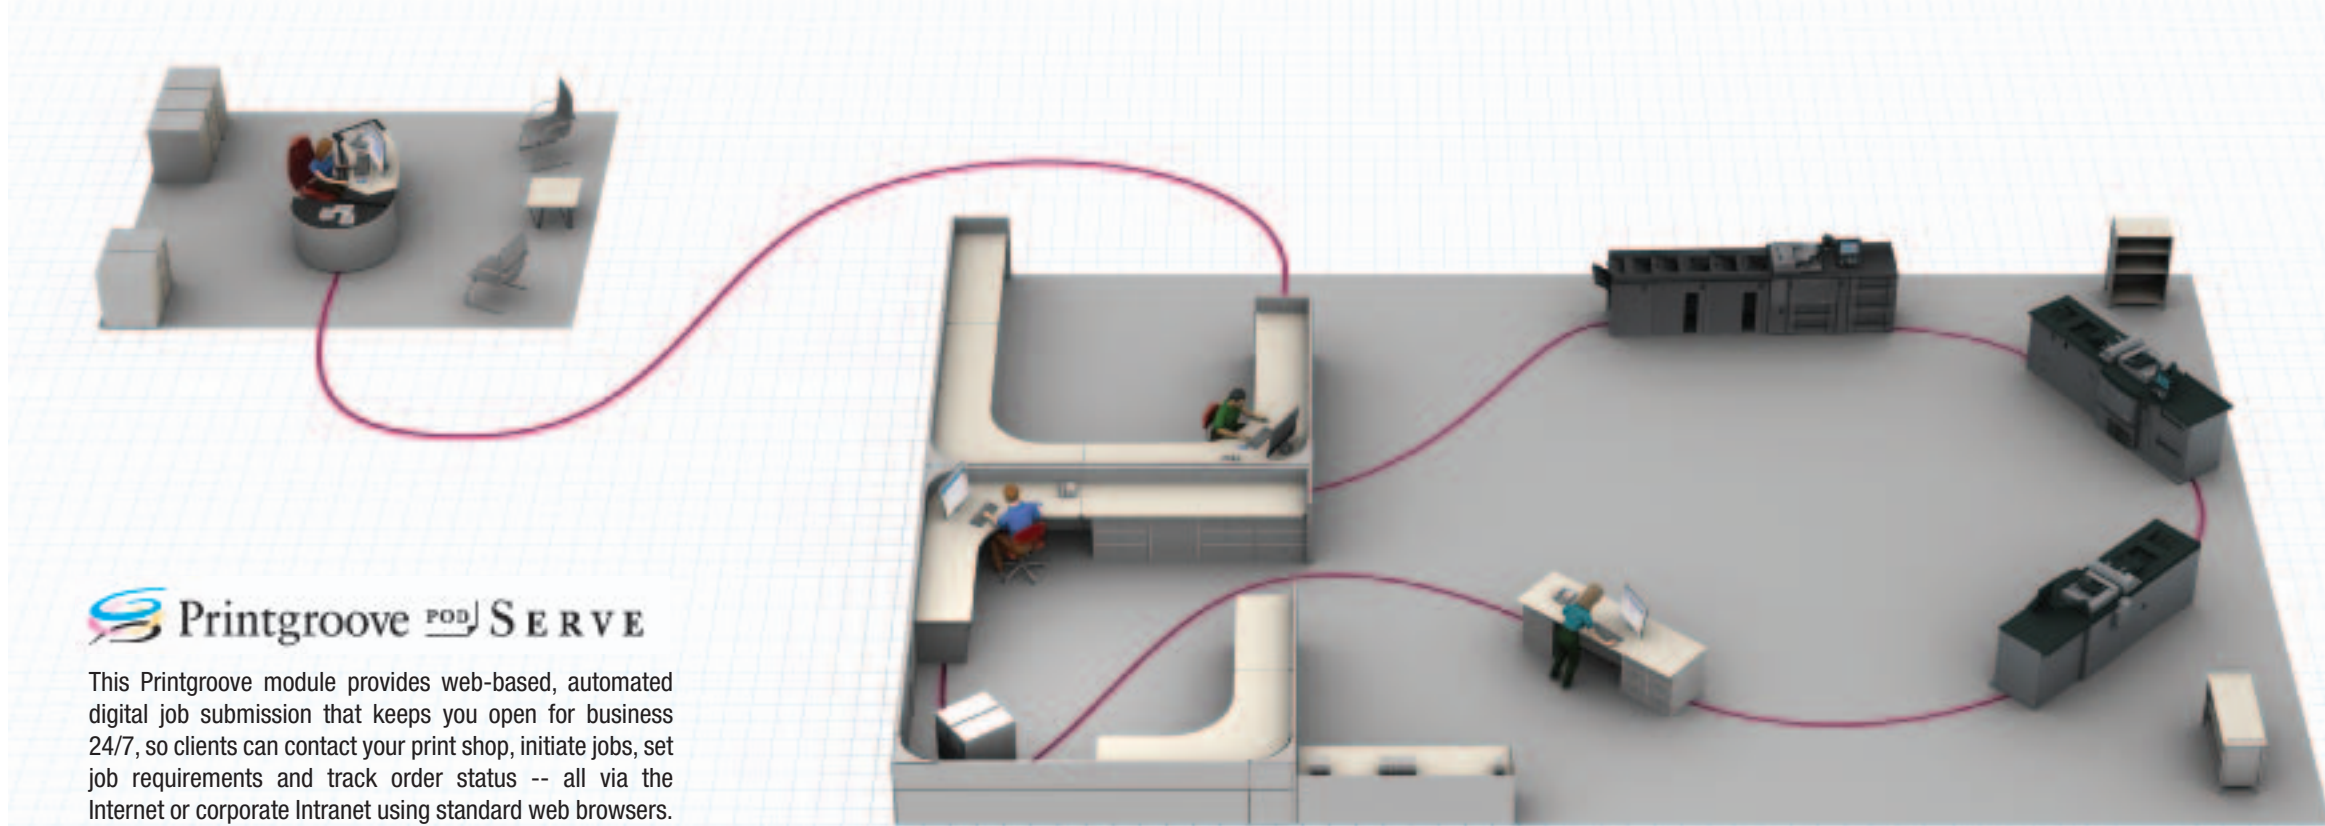

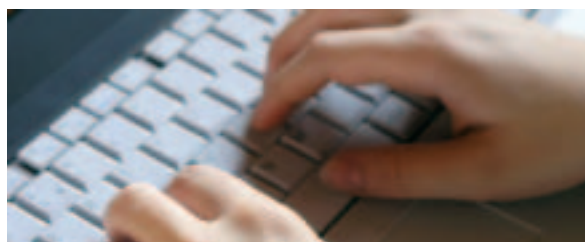

- __Customers perform tasks you used to do manually
- __Creates job tickets, verifies job status in real time
- __Proofs jobs online, track jobs to completion
- __Automatic Email notification every step of the way

Printgroove POB QUEUE

A simple, modular solution that links multiple Konica Minolta bizhub devices throughout your production floor -- to optimize their performance by managing print queues, assigning jobs to "best match" printers, and providing 2-way communication to networked printers for centralized control.

- __Assigns jobs to printers, chooses paper, sets parameters
- __Divides output between color and B&W devices
- __Links up to 10 devices for system-wide productivity
- __Monitors status of devices and consumables

Printgroove in action: 10 steps to seamless productivity.

Even the most complex production print cycle can benefit from Printgroove. All your production print processes can be automated for smooth, seamless throughput — job submission, to finishing and shipping. Changes, updates and unexpected glitches won't compromise your productivity. And your production staff will get more work done in less time — for output that looks better on your bottom line.

- 1** 24/7, you're open for business. Job data is submitted via the Internet, 24/7 — so you're always open for business, even after normal front-desk hours.
- 2** Accept data in any form. Printgroove can handle data in any form, including text, graphics, photos, even multimedia -- so you're not limited to PDF files.
- 3** Customers set job parameters. With automated Printgroove job submission, customers can specify print parameters and finishing needs.
- 4** Job ticketing is automatic. Printgroove creates job tickets automatically and forwards them to your print manager or make-ready operator.
- 5** Estimates by Email. Job quote, cost break out, delivery estimate, terms/conditions and other administrative data can be automatically Emailed to your customer.
- 6** Fast, simple scheduling. Printgroove can optimize the assignment of jobs, easily select "best match" printers, even divide output between color and B&W devices.
- 7** Handle last-minute changes. Job changes enter your production print process automatically, so even last-minute revisions won't throw you off deadline.
- 8** Online proofing. Print managers, proofreaders, even customers can check documents faster and more accurately with online proofing and Email verification.
- 9** Track jobs, monitor status. Job status, device status, even consumables -- Printgroove lets you monitor everything online to keep work flowing.
- 10** Finishing, reporting, billing. Job data is archived to client accounts for use in billing and reports; print data is archived for reprinting on demand.
