DISCOVER THE SAVINGS, SECURITY AND POWER OF PAGESCOPE ENTERPRISE SUITE. Every business shares the need to minimize expenses, maintain security and maximize productivity. PageScope Enterprise Suite helps you accomplish all three goals by tracking activity on your networked or locally connected printers, authenticating users with a wide range of server-based methods – including User name and password, HID Proximity card, and Biometric Authentication – allowing each user to create a customized interface panel based on individual log-in – an interface that stays the same no matter which machine he or she uses.

Because it doesn't require hardware or software enhancements on each machine, PageScope Enterprise Suite saves you money right from the start – No other account tracking and accounting solution combines all these advantages in a powerful three-module design that's easy to install and simple to operate.
